FOR IMMEDIATE RELEASE

Citizens Asked to Share Visions for Next City Leaders

City Seeks Input in Search for City Administrator and Chief of Police

Chowchilla, CA – March 5, 2015

The City of Chowchilla will soon begin holding interviews for two top level positions in the agency – City Administrator and Chief of Police. Citizens are invited to share their ideas on the qualities they believe these two people should have to help guide Chowchilla into the future.

As the City of Chowchilla continues its climb to fiscal solvency and operational stability, the City Council is focusing on reinvesting in the community infrastructure of water, sewer and roads. Recent awards of project grant funds will soon provide positive enhancements in the community, and the City continues to seek other grants to supplement city funding. Agency relationships throughout the region have been strengthened and new partnerships continue to form to enhance the City's services and growth opportunities. Good things are happening in the community that lays the groundwork for a strong future.

But these and other important activities will require a professional and concentrated approach to managing the City in the coming years, and it is recognized that the people of the community vastly contribute to the core values and the vision for a positive future.

As the City interviews the candidates for the City Administrator and the Chief of Police, the City Council wants to consider the values and the qualities that the residents and stakeholders of Chowchilla want to see in the next occupants of these two important and visible community leaders.

Everyone is encouraged to submit their comments to the City Clerk as soon as possible. They can be emailed to cityclerk@ci.chowchilla.ca.us, faxed to (559) 665-7418, or delivered to the Chowchilla City Hall at 130 S Second Street during business hours.
